

MAGNETS AND MAGNETIC SIDE RAIL SYSTEMS

CUSTOM MAGNETIC RAIL SYSTEMS

The Hamilton Form engineering department can work with you to design a custom magnetic side rail system. These systems are accurately made to your specifications. Custom side rail systems assure that your specific requirements are met.

Magnetic Forming Systems

- Custom designed and built
- Can be made to accept risers
- Can be designed for self-stressing casting tables with side rail, window block-outs and weld plates, all anchored with magnets
- Improves productivity and flexibility by giving you the ability to relocate forms in minutes
- Protects forms by eliminating welding, bolt holes and plugs

24" side form with 12" riser anchored with magnets.

Side rails custom made with risers that stack on top.

Header held in place with On/Off magnets.

Side rail anchored to casting table with button magnets. On/Off magnet used to hold welding plate in place.

For more information about magnetic steel form and side rail systems, contact **Hamilton Form Company** at 817 590-2111 or e-mail us at sales@hamiltonform.com.
